A ROOM DRESSED TO IMPRESS

Meeting rooms 4 and 7 at P&J Live are able to subdivide and create two smaller spaces if required by the use of partitions. Like the other meeting rooms, these modern spaces feature advanced 'plug and play' technology systems which can work in conjunction with one another when used in their entirety or separately as required. In addition, they have floor-to-ceiling windows with fantastic views over the venue's grand piazza, all of which can be blocked out at the touch of a button using the in-room touch-screen control panels.
